

## Senior Full-Stack Developer

We are looking for an experienced Senior Full-Stack Developer with a strong Javascript/Typescript background to join our team!

### Requirements

- Proven experience as a Full Stack Developer or in a similar role (5+ years of experience)
- Good knowledge of Javascript, React
- Experience with Node.js (Express.js) is a must
- Experience with AWS and Kubernetes
- Experience with GIT
- Strong knowledge of Relational Databases (such as PostgreSQL)
- Strong knowledge of data structures, algorithms, and designing for performance
- Strong understanding of application scalability and db management
- Experience coding full stack
- Self-starter, with a strong sense of ownership
- Excellent analytical and problem-solving skills with a focus on details
- Passionate about creating innovative products

### English Level

- Intermediate

### Responsibilities

- Develop front and back end of the working project
- Write new features, fix bugs, assist in refactoring, unit tests, and documentation
- Work both independently and in close collaboration with others in the team
- Constantly work on improving your skills and qualifications
- Collaborate with members of product development, creative and editorial, marketing and sales teams
