

Senior JavaScript Developer (Node.js)

If you are an analytical problem solver with strong Node.js knowledge and a passion for teamwork and innovation, we have the perfect job for you!

About the Customer:

The customer's mission is to deliver financial advisory services around the world, including assurance, tax, and financial advisory services

About Our Project:

There is a small application (talent systems for companies), they need a support team that will bring it to mind and will deal with refinements and customization for new clients.

Project Team:

When you join our team, you'll be immersed in a culture where teammates always help each other achieve better results. We believe that together we are greater and that we can find brilliant solutions by sharing ideas.

Project Tech Stack:

- Front End - React, Typescript
- Back End - NestJS (Node)
- Storage - PostgreSQL
- Hosting - Azure

Current Project Stage:

In production
