

# WE ARE HIRING

## Middle Automation QA Engineer (Javascript)

We are looking for an experienced **Middle Automation QA Engineer (JavaScript)** to join our friendly team.

### **About Our Customer:**

The customer is the world's largest human resources consulting firm, headquartered in New York City. The company has over 20,500 employees, is based in more than 40 countries and operates internationally in over 130 nations. Its services are used by 97% of Fortune 500 companies.

### **About Our Project**

**The project** is related to consulting in the insurance, healthcare, and finance industries. The tasks mainly include integration with third-party services, UI implementation using mockups (all of which are on Figma, which is very convenient for developers), and other similar duties.

### **Requirements:**

- 2+ years of experience building and maintaining **automation frameworks**
- Experience with **Protractor**
- Hands-on experience with **JS language**
- Experience with **Cucumber**
- Experience in **manual testing**
- Significant knowledge of test case design techniques
- Understanding of test framework layers
- Experience with performance testing tools
- Passion for testing and an aspiration to deliver high-quality products

### **English level:**

Intermediate +

### **Nice to have:**

- TypeScript, Jasmine, WebDriverIO
- Agile Scrum
- Experience with JIRA

### **Responsibilities:**

- Drive UI Automation testing
- Provide high-quality tests
- Create plans, test scenarios, test cases, and test reports
- Actively participate in the software development process; collaborate with programmers, analysts, and administrators
- Develop and improve a set of testing methodologies, procedures, and tools
- Execute and monitor results of the automated suites within the CI infrastructure
- Create technical and utility documentation
- Work with Jira (issue creation/verification)
