WE ARE HIRING

# Senior Java Developer

We are currently looking for an **Senior Java Developer** to join our innovative team!

## About Our Customer:

**The customer** is one of the largest online gambling companies in the world, with over 26 million clients across all markets. The company was founded in 1997 and listed on Nasdaq Stockholm in 2004. They are committed to offering their clients the best possible deal and user experience, while ensuring a safe and fair gambling environment.

## About Our Project

**Project team** - When you join our team, you'll be immersed in a culture where teammates always help each other achieve better results. We believe that together we are better, and that we can find brilliant solutions by sharing ideas.

## Requirements:

- Advanced experience as a Java Developer with excellent knowledge of SQL
- Experience interacting with and handling varied data sets and data pipelines using a range of data technologies, including Redshift, Oracle, RDS PostgreSQL, and Apache Kafka or equivalent technologies
- Extensive knowledge and hands-on experience on Apache Spark/EMR, AWS Glue, and Lambda
- Hands-on experience on deployment using Jenkins CI/CD process
- Experience with Apache Airflow&Step functions
- Experience building data pipelines, production quality APIs, and products
- Experience deploying software into containerized environments, including Docker and Kubernetes
