

EXADEL

WE ARE
HIRING

Senior .NET Developer

About Our Customer:

The experienced FinTech company provides reliable and up-to-date software utilizing the most innovative approaches. Their software communicates with other systems and is an indispensable part of the IT landscape of central banks and insurance companies.

Project Team:

This project is an eBanking software built as a Microservice platform in .Net Core (C#) using MS SQL for the database and RabbitMQ for messaging. When you join our team, you'll be immersed in a culture where teammates always help each other achieve better results. We believe that together we are greater and that we can find brilliant solutions by sharing ideas.

Requirements:

- Excellence in C#, .NET Core, .NET Framework, Git, Dapper, Entity Framework, and unit testing
- Experience with event-driven and microservice architectures, Domain Driven Design
- Understanding of commonly used design patterns
- Practice in developing new solutions as well as maintaining existing ones
- Expertise in working on a large, complex back-end banking system is an advantage

English level:

Intermediate+

Responsibilities:

- Produce code
- Collaborate with the cross-functional development team to bring static designs and prototypes to life, providing constructive feedback to optimize implementation and usability
- Provide solutions to technical problems of varying scope and complexity
- Collaborate with management to determine priorities and risks associated with projects
- Ensure all relevant processes, procedures, and product documentation are up-to-date
- Participate in all aspects of the product, including design, development, deployment, and maintenance
