## Senior/Lead .NET Developer

### About Our Customer:

The customer is the leading European provider of e-tendering, procurement systems, and information between buyers and suppliers. The European government is a major user of their services.

### About our project:

The customer landed an enterprise-level project within Procure-2-Pay in August 2022. The project is for the Danish government, and the scope is procurement, invoice workflow management, and contract management. The project has 350+ functional requirements, 150+ non-functional, and 50+ process requirements to be delivered within the project's scope.

### Requirements:

- 5+ years of software development experience
- Practice in design, code, and implementation of software within the Microsoft .NET
- Expertise in NET/C#
- Knowledge of MS-SQL
- Proficiency in REST API
- Background in Git
- Ability to provide application support, which includes problem research, analysis, resolution
- Experience in debugging and performance troubleshooting
- Competency in various build tools
- Skills in collaborating cross-functionally and in a team-oriented environment

## English level:

Upper- Intermediate

## Responsibilities:

- Produce code using .NET
- Write unit tests and code that adheres to coding standards
- Provide technical support
- Work both independently and in close collaboration with others in the team
- Communicate with the customer regularly
- Make recommendations for the improvement of the platform and development process to increase productivity
- Optimize the application for maximum speed and scalability
- Implement security and data protection
- Identify, monitor, and resolve project-related issues
